# BRITAIN BIDDING FOR TRADE IN COMPETITION WITH U. S.

(Correspondence Associated Press) Great Britain, with the control of LONDON, Feb. 28.—Jorge A. Mitre, minister of La Nación, of Buenos Aires, Argentina, has an inferior position to take Great Britain some advice concerning the extension of its trade in South America while speaking at a dinner of journalists and public men the other day.

"It may be a matter of some concern to you," said Mr. Mitre, "that the farmers, the South American people during the next few years will have money to spend. There is world-wide demand for food, ours is a food exporting country, and prices are likely to be favorable to the producer. We shall want to buy not only locomotives, ploughs and other machinery, but motor cars, cutlery, plate, furniture, jewelry and finished leather goods. Who is going to supply us with these things?"

"One of the best instruments you can use in shaping your South American policy during the remaking of the world is the British community already established in the South American countries. In addition you must send out your travelers properly equipped. They must speak our language. All the efforts of British manufacturers to meet the requirements of South American markets will fail to be fruitful so long as your commercial travelers are ignorant of Spanish."

"Then there is the fresh flow of capital to South America. I understand that for some time there will be a restriction on the export of British capital to foreign countries, in order that the rate of exchange may be improved. You must be careful not to pursue a mistaken policy in this respect. It is the exchange of goods that makes prosperity and not balances."

"You save time when you use it. Calumet is all baking powder. It begins to raise bakings the instant they are put into the oven. You don't have to keep 'peeping' to see if bakings are all right. You know they are. Calumet is sure—never fails. That's economy. And true economy—in cost—in use—in time."

One trial will prove it and show you in results why millions of shrewd, thrifty housewives prefer Calumet to all other brands.

The unflinching strength of Calumet guarantees perfect results. Not only saves flour—sugar—eggs, etc.—but saves Baking Powder. You use only a teaspoonful—you use two teaspoonfuls or more of most other brands.

Calumet contains only such ingredients as have been approved officially by the U. S. Food Authorities.

## FLYCATCHER PAID BY RIVERSIDE, CAL.

(By Associated Press) RIVERSIDE, CAL., March 15.—Riverside has an official fly catcher. His title appears on the payroll as "sanitary inspector," but he is in reality the town fly catcher, and he is busy every year from early spring to late autumn.

However, the official fly catcher does not operate with a swatter as his sole tool of the trade. He has a large number of big flytraps, owned by the city, which he places about the streets, baits with sweet liquids, cleans, and keeps in repair. Last year, he says, he caught a billion flies, but he admits that this figure is estimated and not a count.

The city fly catcher also aids other sanitary inspectors in preventing the accumulation of garbage, or other fly attractors, and in fact devotes himself exclusively to the pursuit and extermination of the little pests.

To Make Ivory Look Like Silver. Immerse the ivory in a dilute solution of silver nitrate after having thoroughly cleaned it. Then put it into a solution of common salt until it assumes a deep yellow color. Dip it in water, and expose it to the sun's rays until it becomes black. On rubbing, the black surface will soon change to a brilliant silver.—Popular Science Monthly

## QUICKSILVER IN NEED OF PROTECTION

(By Associated Press)

SAN FRANCISCO, March 15.—According to the state mining bureau California yields approximately 60 per cent of the quicksilver output of the United States; and since 1850 has produced a total of 2,137,728 flasks (to the end of 1917), valued at \$191,992,560.

A bulletin recently issued says: "The quicksilver industry, though relatively speaking not as large nor as extensive as some other branches of the mineral business, is nevertheless a very vital one in peace times as well as in war. In normal peace times 50 per cent of our quicksilver consumption goes into fulminate for blasting caps for quarrying and mining as well as ammunition. In addition, a considerable amount goes into the manufacture of drugs. Some also is used in gold and silver mining. We should not permit ourselves to become dependent on foreign sources for this very necessary metal. Without a sufficiently high protective import duty, the United States is at the present time in danger of having its domestic quicksilver industry throttled by foreign competition, particularly from Mexico and Spain. The recovery of quicksilver requires capital for equipment and time for development, and is not a business which can be picked up and put on a producing basis at a moment's notice."

### Unknown Human Qualities.

Fortune, good or ill, as I take it, does not change men and women. It but develops their characters. As there are a thousand thoughts lying within a man that he does not know till he takes up the pen to write, so the heart is a secret to him (or her) who has it in his own breast.—Thackeray.

### LOST IN THE SHUFFLE.

Among the bills that was lost in the shuffle in the assembly was the Kenny bill providing for the solemnization of all marriages and prohibiting the free love stuff and contract marriages. The members of the lower house did not take the Storey senator seriously and killed his bill.
